PROFESSIONAL SUMMARY

Front-end developer with 3+ years of freelance experience delivering 15+ websites and web applications for clients in Arab and Gulf markets. I turn Figma designs into fast, responsive, component-based interfaces with React and Next.js, and build custom WordPress solutions with PHP, ACF, and WooCommerce. Specialized in Arabic RTL and bilingual interfaces. Comfortable owning a project end to end, from requirements to deployment, and communicating clearly with remote clients. Seeking a full-time remote front-end role on a product team.

TECHNICAL SKILLS

Front-End	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Responsive Design, Flexbox, CSS Grid, REST APIs
WordPress	Custom Themes, PHP, MySQL, ACF, Custom Post Types, JetEngine, WooCommerce, Gutenberg, Elementor, WPBakery
Specialties	Arabic RTL & Bilingual UI, Figma-to-Code, Performance Optimization, Cross-Browser Compatibility
Tools	Git, GitHub, Vercel, Chrome DevTools, VS Code, Figma, Hosting, DNS & SSL Configuration

PROFESSIONAL EXPERIENCE

Freelance Front-End & WordPress Developer	2022 – Present
Remote · Khamsat, Mostaqil, Upwork · Clients in Egypt, Saudi Arabia & the Gulf	
- Delivered 15+ websites and web applications end to end, including business and service sites, e-commerce stores, portfolios, and content platforms. - Converted Figma designs into pixel-accurate, responsive interfaces using React, Next.js, HTML, CSS, and JavaScript, built from reusable components. - Developed custom WordPress functionality in PHP and MySQL beyond what themes and page builders provide, including access-control systems and structured content models. - Built Arabic RTL and bilingual layouts, handling text direction, typography, and responsive behavior across desktop, tablet, and mobile. - Integrated REST APIs and third-party services, handled deployment, hosting, DNS, and SSL, and fixed layout, JavaScript, and cross-browser issues using Chrome DevTools. - Gathered requirements directly from clients, managed timelines independently, and maintained a 5.0-star rating on Khamsat.	

SELECTED PROJECTS

Aqari — Arabic Real Estate Web App	Concept project
Custom Code (no CMS) · JavaScript · Responsive RTL UI · GitHub · Vercel	
- Built a custom-coded Arabic real estate web application from scratch, without WordPress or a page builder, with a fully responsive RTL interface. - Structured the codebase into reusable components, versioned it on GitHub with documentation, and deployed it to Vercel.	
Premium Content Protection System — elyasser.art	Client project
WordPress · PHP · MySQL · Elementor · Contact Form 7	
- Built a custom access system with an admin dashboard for managing per-client passwords and access expiry, protecting premium portfolio content. - Implemented page designs, fixed mobile header and blog display issues, and set up contact forms with custom email templates.	
Arabic Business & Service Websites	Client projects
WordPress · Astra · Elementor · Custom CSS · JavaScript	
Delivered RTL websites for Saudi and Egyptian businesses (e.g. alsakinah-sa.com), including custom headers, RTL navigation, and lead-capture forms.
